360 Easy-to-Swallow Capsules

**Andrew Lessman's LIVER ANTI-OXIDANTS** contains highly concentrated standardized extracts of Milk Thistle, Artichoke and Turmeric (Curcumin), along with important nutrients necessary to support liver function. The liver is the largest internal organ in the body, comprising about 2% of the total body weight and is arguably the hardest working organ. The liver must keep our body's internal environment healthy and to do so constantly performs thousands of chemical reactions, including the metabolizing of drugs, alcohol and other chemicals within the body. To support this extremely hard working organ, **Liver Anti-Oxidants** includes our Milk Thistle extract, standardized for high levels of Silymarin. Research has shown that Silymarin is a potent anti-oxidant that specifically helps to protect the liver from free radical damage and helps to stabilize and support liver cell membranes, while also supporting the production of the liver's own powerful anti-oxidant enzymes, such as glutathione. **Liver Anti-Oxidants** also includes high levels of Artichoke and Turmeric (Curcumin) extracts to support the liver's detoxification processes and provide additional anti-oxidant benefits. The liver plays a vital role in our health, yet the way we live places a tremendous burden on this hard working organ, so it only makes sense that we provide it with targeted protection.
